91-100	\$0.75	\$75.00	\$900.00

Please call for pricing on accounts in excess of 100

Mad River Access's spam filtering is a fully managed service which requires no hardware or software. Implementation only requires making a simple change to the DNS records for your domain, there is no interruption in your email service during implementation.

As email passes through our gateway on its way to you, spam, viruses, and phishing threats are filtered out thus eliminating them from ending up in your inbox.

As this processing takes place outside your network, you may also benefit by reducing your traffic and email server processing loads.
